
Benjamín Leonardi

Software Developer

Cordoba, Argentina | ben.max.leonardi@gmail.com | <https://benjaleonardi.github.io/>

SUMMARY

Game developer and technical lead with 3+ years of professional experience including console porting across PS4, PS5, Xbox One, Xbox Series X/S and Nintendo Switch. Helped ship 5+ titles from indie to AAA (including a title for EA) delivering consistent performance improvements of 20-45% on average, achieving performance scores approved by Sony, Microsoft and Nintendo. Deep technical expertise on the Unity Engine, project management and direct client communication.

EXPERIENCE

The Original Gangsters (TheOGS) - *Technical Lead Developer 2023 - 2026*

- Ported 5+ titles to PS4, PS5, Xbox One, Xbox Series X/S and Nintendo Switch, including Storyteller, an Annapurna game, We Need to Go Deeper, Elderand, Skinwalker, My Little Universe and a working title for EA.
- Achieved average performance gains of 40% on Nintendo Switch and 20-25% on current gen consoles, with targeted optimization exceeding 100% improvement in specific bottlenecks and projects.
- Implemented and optimized state machines, reactive AI systems and improved gameplay stability reducing runtime resource overhead.
- Managed requirements gathering and technical communication directly with AAA clients including EA, Team17 and more, ensuring alignment between expectations and delivered solutions.

EANA - *Lead Developer & Project Manager 2022 - 2023*

- Led development of a national airspace request tracking and analysis platform, serving as both technical lead and project manager.
- Coordinated a cross-functional team, managed stakeholder communication, and translated business requirements into measurable technical deliverables.

Pensions and Savings Córdoba - *IT Tech & Developer 2020 - 2023*

- Built internal tools including a WhatsApp chatbot and infrastructure management systems to optimize operational efficiency, such as a warehouse software.

EDUCATION

Universidad Tecnológica Nacional - FRC - *Systems Engineering 2017 - 2023*

- Thesis: Airspace Reservation Management System (ReApp), project developed directly in collaboration with EANA.
